

HARTMANN

Looking back and ahead

Past and future challenges in infection prevention

On 15 June 2023, HARTMANN will continue its lecture series "Safety first – Rethinking infection prevention".

This year's theme looks at the lessons learned from the COVID-19 pandemic and the challenges ahead.

Experts from different fields will provide information about the current status of basic hygiene and new studies.

And of course there will be concrete guidance for effective infection prevention in healthcare facilities: for today and tomorrow.

A detailed programme and a form for registration can be found online on the website of the HARTMANN SCIENCE CENTER:

hartmann-science-center.com

We look forward to seeing you.
